EDUCATION

Symbiosis Institute of Technology (SIT)

B.Tech in Robotics and Automation

Pune, India

2024 – 2028

PROJECTS

Awesome Game 3 (Multiplayer FPS) | *Unity, Fusion 2, C#*

Dec. 2025 – Present

- Developing a first-person shooter game utilizing the Unity engine.
- Implementing multiplayer architecture and real-time network synchronization using Fusion 2.
- Designing core gameplay mechanics, player controls, and interactive 3D environments.

Doomscroll Preventer | *JavaScript, Chrome Developer API*

2025

- Developed and published a browser extension to the Chrome Web Store to discourage infinite scrolling.
- Engineered a 5-second delay prompt specifically targeting Instagram to improve digital wellbeing.

Utility Applications | *Python, Tkinter, yt-dlp*

2025

- Built a desktop To-Do List application with a GUI and persistent local storage using Tkinter.
- Engineered an automated script utilizing yt-dlp to download media, manipulating metadata for chronological sorting.

Meowstroids | *Unity, C#*

Sept. 2025

- Developed a fully playable 2D arcade-style game inspired by the classic Asteroids.
- Programmed core game logic, object spawning, physics, and collision detection using C# scripts.

Personal Websites | *HTML/CSS*

Late 2024

- Designed and developed two responsive websites under a single project initiative: a professional portfolio and a centralized social links directory.
- Structured clean, accessible UI components to establish a cohesive online presence.

EXPERIENCE & EXTRACURRICULARS

Independent Digital Creator & Designer

Remote

Multimedia & Fashion Design

2024 – Present

- Produce and edit digital multimedia content utilizing DaVinci Resolve, Adobe Illustrator, and Affinity Photo.
- Design vector mockups and comprehensive Tech Packs for fashion apparel, preparing files for direct manufacturing.
